

The Gods Come

Official white paper of "Gods Descent", updated in September 2021

Game Background

After Zeus sealed his father Cronus, he ruled the sky, the sea, Land, and hell. However, in Tartarus, the abyss of hell, a powerful giant monster was sealed. Medusa led Cerberus and Hydra, Kiklops and Hundred Heads. Bin Laden came to the evil land, and those who wanted to destroy her would pay the price. The evil forces attempted to attack the Temple of Olympus in an attempt to defeat the gods. Warriors, join us and fight evil with the gods. Maintain the world.

Game

The Gods Come is innovative farm mining/PVE/(PVP) and the latest NFT trend.

GamePlay

We replaced the agricultural system with PVE, and PVE can get token rewards. Now, we are going to unlock the ready-made Lord God obtained in the NFT treasure chest. Its success rate is 100%. Each main god will have different attributes, and main gods are not divided into levels. Mixed teams can quickly destroy BOSS and get TGC tokens. Next, open the weapon NFT treasure chest to get the enhanced artifact. Your main god will have more power and can quickly destroy the BOSS to get TGC token rewards. Yes, the faster the BOSS is destroyed, the more your bounty will be. TGC is built on the Binance Smart Chain, combined with the latest market trends, our team has been working hard for months to develop a stable ecosystem to provide leisure players and investors with skyscrapers and sustainable value. All NFTs are limited.
